New York. September 18.—Wall Street was rather more interested to day in the visit to this city of a representative of the Treasury Department than in the movement of stocks. It is understood that the treasury official consulted with banking interests regarding a possible money stringency, for the purpose of laying the exact facts before MacVeagh. Our banks suffered a further loss of cash and call money, which opened at 5 per cent and ruled at that point for the greater part of the day. Time money ruled firm, but the supply was decidedly more scant.

ly more scant.

The stock market opened with some indications of yesterday's active and higher movement. Most of the leading issues, particularly the anthracted shares. Harriman and Hill issues and numerous other stocks were up from substantial fractions to a point, some of these gains being extended in the

of these gains being extended in the very busy forenoon.

Realizing sales and short selling wiped out a large part of the gain in the afternoon. Reading was the weskness of the leaders, with considerable pressure against United States Steel and some of the coppers, none of which had parteipated materially in the early upward movement. Bonds were at first inclined to harden, but became irregulag with the late reaction in stocks. United States government bonds unchanged on call.
